

St. John's Health Center Santa Monica Outpatient Ambulatory Surgery Center

- Design and Construction of new 10,000 SF outpatient ambulatory surgery center with four OR's in an existing medical office building (MOB).
- Tower General Contractors was the lead entity on this project and managed all of the design professional as well as the subcontractors.
- The design and construction required careful coordination with the owners vendors and equipment suppliers to insure that that equipment was properly supported relative to structural design and utilities.
- The design was performed under OSHPD 3 jurisdiction and built to those standards.
- The work included all aspects of interior remodel work from demolition through finishes.
- We designed and installed a complete medical gas, air and vacuum distribution system as part of the surgery center.
- The work was conducted in an existing operational MOB and we had to insure that we did not disrupt the ongoing operations.

10923 Randall St. Suite E, Sun Valley, CA 91325 P: 818 768-3530 F: 818 768-3534
