

Union Bank Simi Valley Branch –Ground Up Design Build

- Design and construction of new 5,000 SF ground up Union Bank at the Simi Valley Mall
- Tower General Contractors was the lead entity on this project and managed all of the design professional as well as the subcontractors.
- The design and construction required careful coordination with the banks vendors and equipment suppliers as well as with the management of the mall.
- It included the installation of a modular vault and an ATM.
- The design and construction was performed under the City of Simi Valley jurisdiction.
- The work included all aspects of ground up construction from civil work, construction of the bank building all the way through finishes.
